

TECHNICAL SHEET

PRODUCT: CERATEK®

DESCRIPTION

Mono-component metallized transparent formula.

USE

It protects the resin surfaces, making it easy cleaning and maintenance since it produces a film with high gloss and it is resistant to alcohol, disinfectants, detergents, etc. The maintenance can be made also with mono-brushes at low and high speed, and its scent gives a pleasant environment deodorizing.

TECNHICAL DETAILS

Aspect	white liquid
Odour	pine
pH	9+0,5 at 15°C
Specific weight	100 gr/lit + 10 at 15°C
Biodegradability	does not contain surfactants
Yield	lit/sqm 0,05

APPLICATION PROCEDURES

Shake before use; remove wax from the surface to be treated, rinse thoroughly and spread with a humid wax-spreader at temperatures higher than + 15°C and relative moisture less than 70°, in a thin and uniform layer. At dry surface, wait 20 minutes and apply the following hand. The applicable hands are related with the degree of gloss desired.

STORAGE

Can't stand the cold.
