

TECHNICAL SHEET

PRODUCT: POLISHING® – Polishing product

DESCRIPTION AND USE

POLISHING® is a self-polishing emulsion properly studied to be used to give back and maintain brilliance of resin floors.

APPLICATION PROCEDURES

POLISHING®, after dilution, should be spread on surfaces to clean; wipe then with a dry/humid cloth. It is advisable to use a mono-brush with discs of different colours according to the degree of dirt to be removed (black, grey, blue, red, brown and white).

DILUTION

Dilution: from 5% to 12% of POLISHING® per 1 litre of water, according to dirt.
