

# TECHNICAL SHEET

## PRODUCT: PRINK®

### DESCRIPTION

Mono-component transparent formula, solvent-free, synthetic water-soluble resin-based.

### USE

Thanks to its unique property of penetrating supports and plaster, it avoids the collapse and consolidates, waterproofing and making anti-dust, surfaces of:

- Cement
- Plaster
- Porous stones
- Wood

It is also used as insulating substrate and to anchor our line of products.

### TECHNICAL DETAILS

Yield	According to absorption of the support Indicatively kg/sqm 0,100
Hardening at + 20°C	According to the penetration, 2 to 5 h
Specific weight	1 Kg / lt.
Application temperature	Minimum + 5°C, suggested +20°C
Working time	It has no time limits

### APPLICATION PROCEDURES

After cleaning the surface, apply by brush or roller or spray.

### CHARACTERISTICS

Non-toxic, non-flammable, non-harmful.

### STORAGE

Store in a dry place. Can't stand the cold.
